A Life setup that walks you through it

Set up your whole family one small step at a time. A friendly Getting started guide, a dashboard that shows how far you have come, and a little celebration at every milestone.

- ✦ Add your family in a tap: partner, kids, baby, grandparents and pets, with invites for adults
- ✦ Bring in your phone, Google or Outlook calendars without leaving setup
- ✦ Every area of the app, one bite-size step at a time, with a ring for each
- ✦ Pick up exactly where you left off, whenever you like

Opti that picks up the phone

US · Coming soon to more countries

Opti can ring you before you need to leave, check in on loved ones, and answer when you call your own Opti line. Businesses can call back and quote a booking reference.

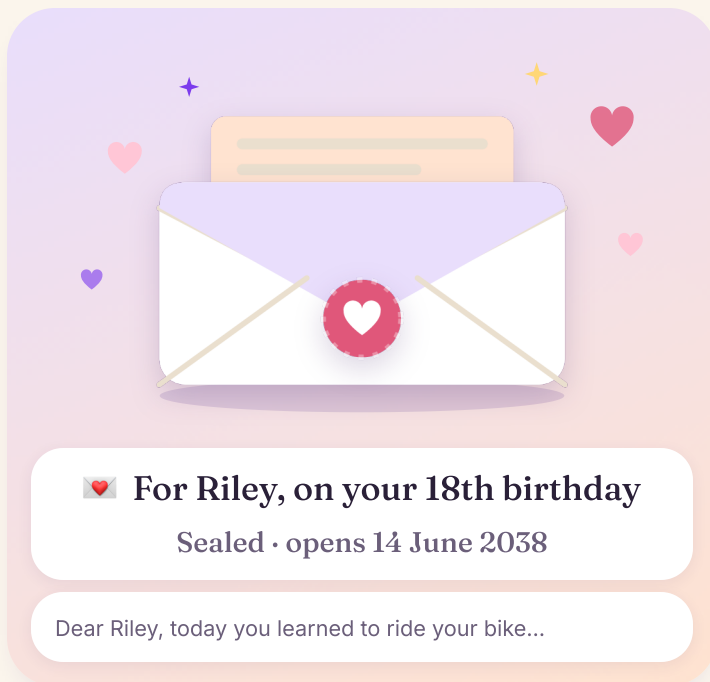

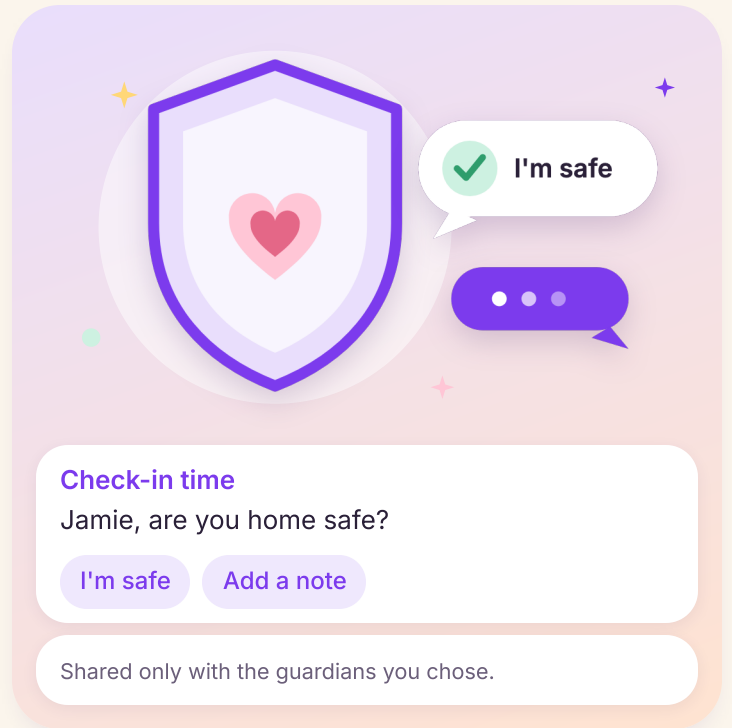

- ✦ Call alerts that ring you when it's time to leave
- ✦ Care check-ins that reach family members, even without the app
- ✦ Your own Opti line, one number to call
- ✦ Business callbacks matched by booking reference
- ✦ Move or cancel a booking by phone, with a calendar clash check
- ✦ Answer a business's question mid-call right from the chat

Family Safety, always by permission

US • Coming soon to more countries (reminder calls)

Gentle, opt-in check-ins that let loved ones tap "I'm safe". Every adult decides what to share, and nothing is shared without their say.

- ✦ Set a schedule; guardians are reminded if a check-in is missed
- ✦ Share only what each person chooses
- ✦ Optional mood and a short note

Letters to your children

Write now, sealed until a day you choose: a birthday, an age, a milestone. Add words, a P.S., a photo or a voice note. Letters are encrypted and stay private to you until delivery.

Private events and surprises

Make any calendar event private, or hide it from one person for a surprise. Others see only a quiet "Busy" block, so plans stay clear without giving the game away. The calendar is also much faster for large households.

Private

Only you can see the details

Hidden from Alex

Surprise party planning

Alex sees: Busy

Import your data

Calendar (ICS)

Task lists

CSV

Anything else

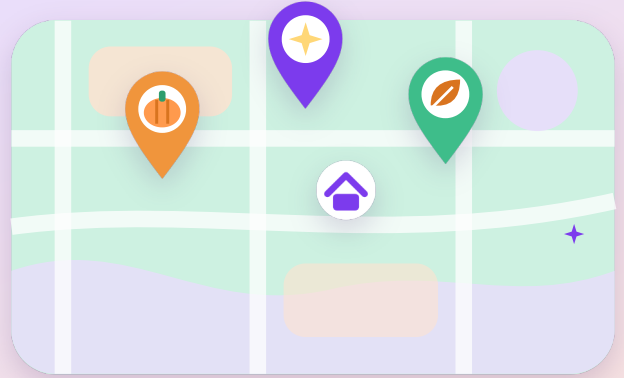

Review 24 items, then add

Bring your data from other apps

The new Import hub gathers every way to bring things in. Drop in a calendar or task list and Opti reads it, shows you what it found and waits for your OK before adding anything. You can also verify your mobile in seconds.

Smarter ideas near you

Local suggestions follow your saved home, change with the season and holidays, and stay varied. Save a business through Opti and its address and contact details fill in. Say what you need at home and Opti can request quotes for you to confirm.

This weekend near home

Pumpkin patch, 12 min away

Home help

Gutter cleaning: 3 quotes requested

Dentist details filled in automatically

Where did we put the passports?

Top drawer, hall cupboard. Want a reminder before the trip?

Yes please 😊

Ask Opti everywhere

Chat with Opti in WhatsApp and Telegram, including your family group. Hear your daily brief with Listen, pause or stop read-aloud, and watch friendly thinking animations while Opti works. Changes by others in your household show up the moment you return.

- ✦ New voices, companions and family nicknames
- ✦ One Life Score screen for Score, Points and Streak

Made for families

Every family member, every part of life, one calm place. Mixed households, shared plans, private moments, all by permission.
